

Providing reassurance, minimising risk and a safe place for staff and customers is a top priority when re-opening your business.

Join the many top Hotels, restaurants, retailers and salons who choose our EU award winning chemical free UV-C ozone disinfection solution.

Our patented UV-C ozone technology provides airborne and surface disinfection up to 99.99% of all surfaces as the ozone generated will reach every chink, vent, wall, counter and touch point and permeate fabrics and furnishings.

JIMCO global leaders for 27 years in UV-C ozone technology recently tested our equipment on Vaccinia the most robust enveloped virus, known to survive for 9 days on surface and the standard for enveloped virus in Europe.

In their expert opinion Dr Brill & Dr Steinman from the Institute for Hygiene and Microbiology and an Internationally accredited lab in Germany concluded that our UV-C ozone technology inactivates COVID-19 (SARS Cov-2) and all corona virus as it has met the highest standard of testing on enveloped virus.

We can provide cost effective portable solutions which you can operate 24/7 reducing virus, mould bacteria, fungus and odours and constant air cleaning and a deep disinfection while people are not present.

Why Choose JIMCO portable air purifiers:

- Proven effective on all Corona Virus, bacteria, mould, fungus and Odour
- EU Clean technology award winner
- Can cost as little as €2.20 per day
- Chemical free solution
- European Technology Verification (ETV) certified
- Clients include Top Hotels, Restaurants and Retailers
