

TEMPERATURE MEASURING TABLETS

Our commercial grade, easy to install “out-of-the-box”, temperature screening tablets are designed as a first layer of defence to instantly measure the body temperatures of your visitor and staff.

Based on technology developed in Germany, the highly accurate auto-calibrated sensor measure with a tolerance of +/- 0.3 degrees Celsius (+/- 0.5 degrees Fahrenheit). Our TAURI tablets also come with a 2-year warranty.

Designed to display and operate within commercial environments these tablets use international standard VESA mount brackets for wall, floor stand or Desktop display.

Benefits:

1. Screening is accurate with alerts detected within 1 second
2. Hygienic non-touch infrared technology
3. Multiple devices can be monitored by a single user
4. Desktop, wall or floor mounted
5. Play Customisable screen saver video when not scanning
6. Optional Face recognition
7. Mask “prompt” option
8. TCPIP Relay for door access control
9. Regular software updates synced via WiFi
10. Android operating system
11. Fan-less Commercial grade Tablets, designed for years of use
